Subject: REACH Inquiry

Dear Valued Customer,

The purpose of this message is to acknowledge receipt of your request for REACH compliance information from Korry and provide Korry's status.

Korry Electronics Co. (Korry) has previously complied with the European Union's (EU) REACH Regulation by biannually assessing the materials used at Korry for REACH Substances of Very High Concern (SVHCs) and performing a worst-case product analysis if any materials are found to contain SVHCs. If the worst-case analysis showed SVHC content >0.1 % by weight in the product (article), additional products (articles) were examined and affected customers notified if products were believed to contain SVHCs >0.1%.

On September 10<sup>th</sup>, 2015, the Court of Justice of the European Union (CJEU) ruled that subcomponents of products should be considered individual articles under REACH, and are therefore subject to reporting.

Korry Electronics Co. has contracted the services of a third party provider, Assent Compliance, to act as our agent in the response to all REACH data and information requests. Korry and Assent Compliance are in the process of exchanging data to permit Assent to gather data from the supply chain and generate the required analyses.

Assent Compliance will be contacting you in response to your request to Korry as soon as information is available.

A handwritten signature in black ink, appearing to read "Shannon Younger".
